The Mayfield Imaging Center

CRESTVIEW HILLS, Ky. -- The Mayfield Imaging Center, a subsidiary of the Mayfield Clinic, features state-of-the-art magnetic resonance imaging (MRI) technology, which provides the most advanced, high-field images available.

The Center provides convenient services for patients and physicians, including:

- rapid appointment scheduling (same day or next)
- comprehensive results within 24 to 48 hours
- maximized patient comfort and short exam times (30 minutes or less)

The Center also provides access to the Mayfield Clinic's world-class neurosurgical expertise and care. If a radiologist detects a possible neurological problem during a preliminary review of a patient's films, on-site neurosurgeons will provide an immediate review.

The Mayfield Clinic is affiliated with the University of Cincinnati Department of Neurosurgery and The Neuroscience Institute, a neuroscience center of excellence located at The University Hospital in Cincinnati. Mayfield has office locations throughout Greater Cincinnati and Northern Kentucky.

The Mayfield Imaging Center, which opened in 1998, is located in the Mayfield Clinic's Northern Kentucky office in the Chapel Place Medical Building, 350 Thomas More Parkway.
